

Digitalk Log Parser on Mobile Devices!

How about checking the logs on your mobile device? It may give you a huge advantage when you're on the move. Having both parsed logs (left image) and details of each call (right image) it can't be easier to make a decision wherever you are. All you need is an Internet enabled mobile device to start checking or monitoring your Digitalk switch. Simply point your browser to Digitalk Log Parser page -- you can try it with our demo version as well at <http://ntunix.net/rtlogparser/tester/>
